#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Election/Restrictions*

1. Claims 12-18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 10/4/10.

### *Drawings*

2. The subject matter of this application admits of illustration by a drawing to facilitate understanding of the invention. Applicant is required to furnish a drawing under 37 CFR 1.81(c). No new matter may be introduced in the required drawing. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d).

### *Claim Rejections - 35 USC § 112*

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 19-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors. For example **only**:

Art Unit: 3725

With respect to claim 19: the phrase “drying a quantity of cement raw material using a roller mill” is vague since it is not clear how using a roller mill can dry any material?

With respect to claim 19: the phrase “more than four milling rollers arranged in facing pairs” is vague since “more than four milling rollers” may encompass odd numbers of rollers (5, 7, 9....). It is not clear how odd number of rollers could be arranged in facing pairs?

Claim 19 is indefinite since all that the applicant considers to be encompassed by the phrase “the more than four milling rollers provide approximately 100% redundancy of four milling rollers arranged in two facing pairs and that four milling rollers arranged in two facing pairs provide approximately 80% of the full milling capacity of the roller mill” cannot be determined.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 19-22 are rejected under 35 U.S.C. 102(b) as being anticipated by either DE 105,099 or DE 197,028,54 or DE 216,621,9 or Poeschi (6,276,620) or Brundiek (5,244,620).

The claims are interpreted as best understood by the examiner. The claims are interpreted as requiring a rolling mill including a plurality of rollers that could be swung

Art Unit: 3725

out while the operation continues. Either DE 105,099 or DE 197,028,54 or DE 216,621,9 or Poeschi or Brundiek is considered to clearly show a method of producing cement having the steps of the claims that can be understood.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Faye Francis whose telephone number is 571-272-4423. The examiner can normally be reached on M-F 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dana Ross can be reached on 571-272-4480. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
